Senior UX Designer @redBus

UX designer with 5+ years designing complex, data-rich enterprise and B2B applications, from user research and information architecture through wireframes, high-fidelity prototypes, and shipped, accessible interfaces. I specialize in back-office operational and transaction workflows, ground design decisions in research and usability testing, and contribute to and evolve design systems in Figma (components, variables, and design tokens). I partner closely with product managers, engineers, and domain experts to deliver user-centered experiences and the documentation that supports them.

WORK EXPERIENCE

5+ years of experience

redBus | MakeMyTrip Group

Senior UX Designer

July 2024 - Present

Bangalore

- Led **end-to-end UX** for redPro's core operator workflows, an **enterprise operational platform**, taking flows from **user research and information architecture** through **wireframes, high-fidelity prototypes, and shipped interfaces** across web, tablet, and mobile.
- Redesigned the OTA **transaction reconciliation** tool, a **data-rich, back-office financial workflow**, using **user interviews and journey mapping** and a progressive-disclosure information architecture so operators could resolve transaction mismatches at a glance.
- Conducted **user research (interviews, surveys, and usability testing)** and translated findings into **data-driven design decisions** for AI-powered, data-rich dashboards surfacing occupancy, revenue, and competitor pricing with recommendations.
- Contributed to and governed the **design system** in Figma (**components, variables, and design tokens**), and built HubbleUI, an AI-driven plugin that flags off-system usage automatically, **contributing to the evolution of the design system**.
- Championed **accessibility compliance**, bringing the redPro experience into **WCAG AA compliance** through a full audit and a rebuilt token layer, and produced **design documentation and specifications** for engineering.
- Partnered with **product managers, engineers, and domain experts** to raise revMax adoption from **20% to 32%** and cut flagged tickets **34% across 120+ operators**, iterating quickly on research and feedback.

Unisys India (Qess Corp)

Senior UI/UX Designer

June 2022 - June 2024

Bangalore

- Boosted design-team efficiency **~60%** in reusable patterns adopted across multiple squads, by componentizing Figma templates and prototyping systems and **mentoring** designers on adopting them.
- Took multiple enterprise feature sets from early framing to production-ready UI, by leading UI/UX visual and interaction design across the full product lifecycle.

Workik

Product Designer

May 2021 - June 2022

Bangalore

- Delivered high-quality design work consistently on schedule under tight timelines, by independently leading projects and prioritizing scope with a **user-centered design** approach.
- Shipped production-ready design solutions across the full product lifecycle, by partnering closely with engineers, product managers, and QA to translate requirements into usable interfaces.

EDUCATION

Master of Business Administration (MBA)

Army Institute of Management, Kolkata

2020 - 2022

GPA: 9.3

With a primary focus on Marketing and Analytics, I gained a deep understanding of business needs, and how design connects with it.

AWARDS

Dream Team Award

Best Designed & Executed Product of the Year: redPro Dashboard

2025 - 2026

Runners Up, Product Hackathon

Kairos: AI-assisted bus-operator onboarding console

2026

Trailblazer Award

Best Performer of the Year

2024 - 2025

CERTIFICATIONS

Design Thinking For UX Designers

Indian Institute of Technology Delhi (IITD)

2022 - 2023

CASE STUDIES

Reconciliation Tool

OTA transaction reconciliation redesign using a progressive-disclosure framework that made mismatches clear to operators.

[View Case Study](#)

Design System

HubbleUI token and component system paired with an AI-driven Figma plugin that catches design drift automatically.
