

Senior UX Designer @redBus

Product designer with 5+ years shipping enterprise software and data products through an end-to-end design process, from user insights, product data, and business needs to flows, prototypes, and specifications. I bring an AI-forward mindset, using AI in my daily design workflow and designing explainable, AI-powered experiences, along with systems thinking, design-system alignment, and pixel-level refinement. I work closely with Product Management and Engineering on tradeoffs, design rationale, implementation reviews, and delivery.

WORK EXPERIENCE

5+ years of experience

redBus | MakeMyTrip Group

Senior UX Designer

July 2024 - Present

Bangalore

- Ship **enterprise software and data products** for redPro, an operator platform used daily across India and LATAM, running an **end-to-end design process** that turns **user insights, product data, and business needs** into user flows, wireframes, prototypes, and specifications.
- Led the revamp of the redPro homepage dashboard (**Dream Team Award**), a **data-rich** view of occupancy, revenue, and competitor pricing with recommendations, using progressive-disclosure patterns to turn complex data into clear decisions. It now drives **~130-150 LMRDs every month (15% of all LMRDs), 1,100+ leads for Rise, ~600 for revMax, and 30% high-intent leads**.
- Redesigned the OTA **transaction data reconciliation** tool so users resolve mismatches at a glance, and shipped an **anomaly-detection dashboard** that raised revMax adoption from **20% to 32%** and cut flagged tickets **34% across 120+ operators**.
- Built an **AI-driven Figma plugin** (HubbleUI) and use **Claude and Cursor in my daily workflow**, with **design-system alignment** across components, tokens, and **pixel-level refinement**.
- Apply **systems thinking** so changes in one workflow stay coherent across the wider platform, and brought the experience to **WCAG AA accessibility compliance**.
- Partner with **Product Management and Engineering** on tradeoffs, **design rationale, implementation reviews, and QA**, presenting work to peers and stakeholders.

Unisys India (Qess Corp)

Senior UI/UX Designer

June 2022 - June 2024

Bangalore

- Boosted design-team efficiency **~60%** in reusable patterns adopted across multiple squads, by componentizing Figma templates and prototyping systems and **mentoring** designers on adopting them.
- Took multiple enterprise feature sets from early framing to production-ready UI, by leading UI/UX visual and interaction design across the full product lifecycle.

Workik

Product Designer

May 2021 - June 2022

Bangalore

- Delivered high-quality design work consistently on schedule under tight timelines, by independently leading projects and prioritizing scope with a **user-centered design** approach.
- Shipped production-ready design solutions across the full product lifecycle, by partnering closely with engineers, product managers, and QA to translate requirements into usable interfaces.

EDUCATION

Master of Business Administration (MBA)

Army Institute of Management, Kolkata

2020 - 2022

GPA: 9.3

With a primary focus on Marketing and Analytics, I gained a deep understanding of business needs, and how design connects with it.

AWARDS

Dream Team Award

Best Designed & Executed Product of the Year: redPro Dashboard

2025 - 2026

Runners Up, Product Hackathon

Kairos: AI-assisted bus-operator onboarding console

2026

Trailblazer Award

Best Performer of the Year

2024 - 2025

CERTIFICATIONS

Design Thinking For UX Designers

Indian Institute of Technology Delhi (IITD)

2022 - 2023

CASE STUDIES

Reconciliation Tool

OTA transaction reconciliation redesign using a progressive-disclosure framework that made mismatches clear to operators.

[View Case Study](#)

Design System

HubbleUI token and component system paired with an AI-driven Figma plugin that catches design drift automatically.
